A simple, cost-effective way to maintain and replace an existing Cooper WAVES* system

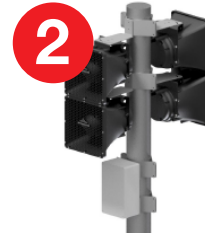

Easy, two-step approach:

1 Replace the obsolete software with CAPSOL's Emergency Alert Software.

Maintain existing amplifier and speakers.

2 Replace Speakers and Amplifiers with Hyperspike® TCPA-Q Array

Replacing the discontinued WAVES radio system and software with CAPSOL's Emergency Alert System provides superior command and control performance while maintaining the existing giant voice amplifiers and speakers. Options are available for Emergency Computer Messaging and Live Voice.

CAPSOL Emergency Alert System provides:

- Cost effective phased transition to new solution
- The latest Command and Control technology
- Fully integrated platform
- Superior voice intelligibility
- Reuse of existing radio frequency
- Local support

Installing Hyperspike® Amplifiers and Speaker Arrays provides incredible intelligibility; far exceeding that of any other manufacturer. Various speaker configurations available to meet your application.
