

CAPSOL's CC-TCPA-Q4 Outdoor Notification system follows CAPSOL's overall design focus – A Modular, Scalable product.

The Omni directional high powered speaker system by Hyperspike® is capable of tone, text to speech and live voice commands over large outdoor spaces. This new configuration is designed to meet the growing demand for outdoor notification.

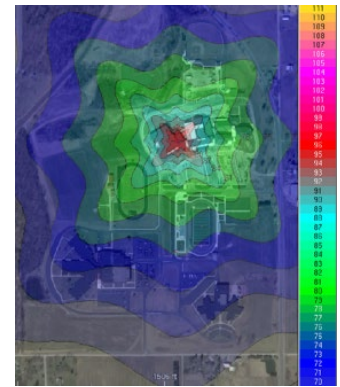

Multiple speaker configurations are available. Mounting on a pole, a building or rooftop provides numerous options for this wide area Mass Notification system design.

These Giant Voice speaker arrays are an integral part to an overall Life Safety system. Used with other products in the complete CAPSOLSuite, getting the right message to the right people when needed can be achieved.

## Features and Benefits

- Cost Effective Outdoor Notification
- 135 dB Acoustic Output
- Lightweight and Small Footprint
- UL1480 Speaker System
- UL62368 Amplification System
- CID2 Listed Speaker System
- Ethernet and Radio Options
- Multiple Configurations
- VHF, UHF, Unlicensed Band
- Local or Solar Power

## Acoustic Overlay High School Campus

The Modular Design provides a cost effective two step approach updating or replacing existing Giant Voice systems.

When used with CAPSOLControl, CAPSOL's TCPA Series can function as mass notification, emergency communications, personnel notification, and citizen warning system for natural or man-made disasters. It can also be used for training and exercises, general announcements, crowd control and special events.

**WHO WE ARE:** Since 2013, we have been developing systems to identify potential threats and provide early notification. The CAPSOLSuite is designed to gather, identify, and process data as early as possible to mitigate a threat. Notifying all affected people quickly and clearly makes lives safer.
